

Baltic Sea Center, Stockholm University Sweden

Maciej T. Tomczak

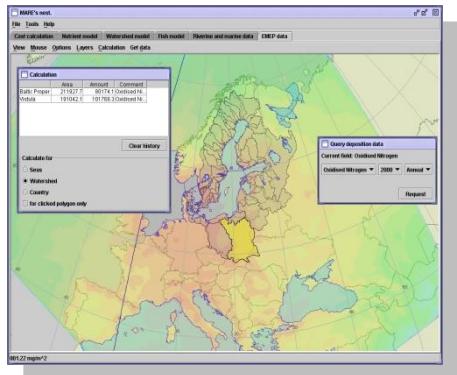

MAREFRAME – BSC Main Expertise:

- Baltic Sea ecosystem
- Multiplay ecosystem forces (fisheries, eutrophication)
- Integrated Ecosystem Assessmet
- Food-web modeling
- Ecopath with Ecosim
- Ecological Network Analysis
- “Baltic NEST” (Decision Support System)
- DAS (Data Asimilation System) for Baltic Sea
- BED (Baltic Environmental Database)
- BALTSEM – biogeochemical model for Baltic Sea

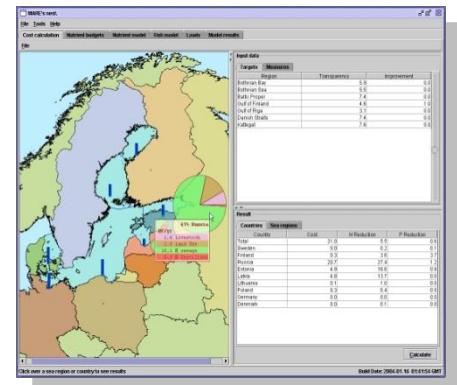

Marine modeling

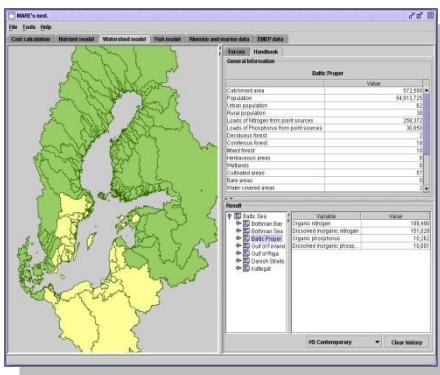

Atmospheric emissions and load

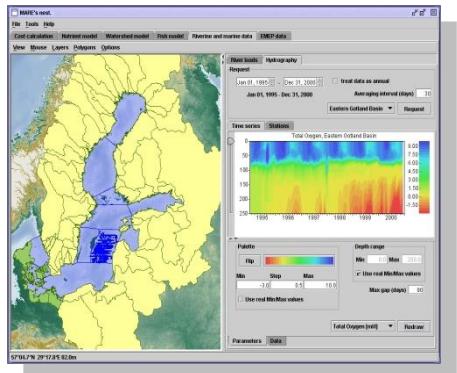

Cost minimization model

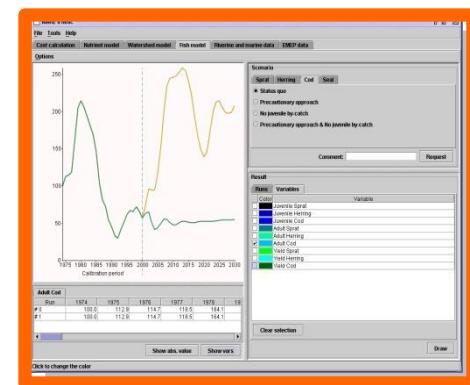

NEST DSS builds on six different models
www.balticnest.org

Drainage basin modeling

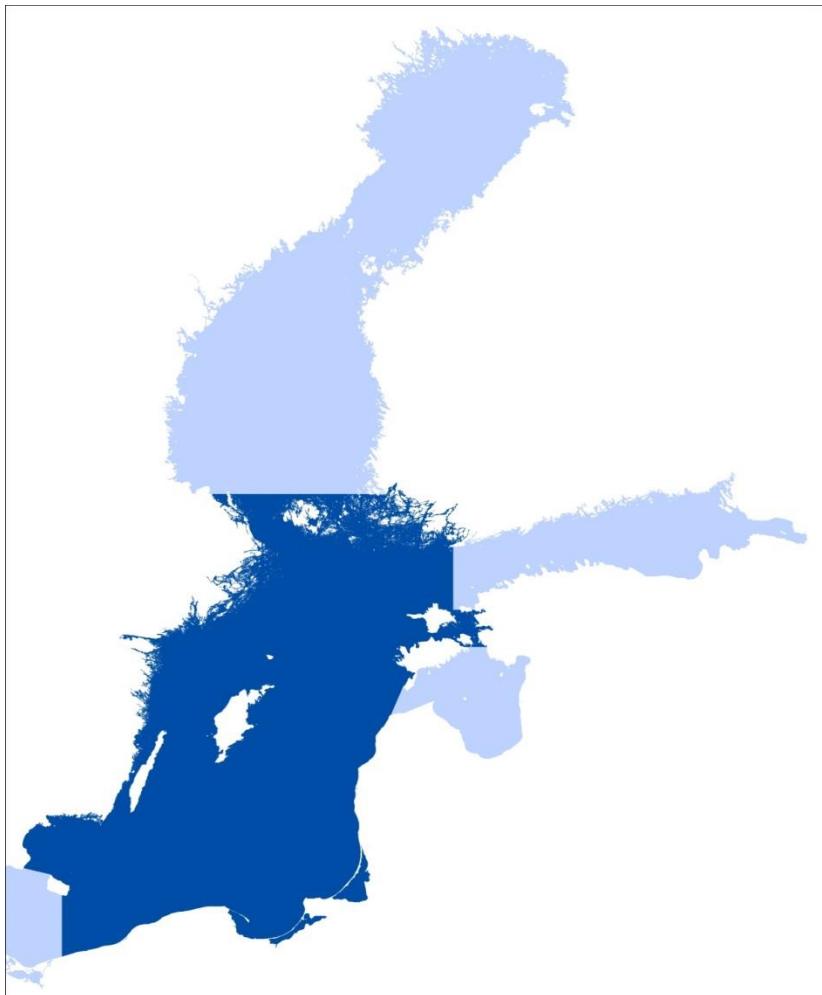

Marine and runoff data

Fishery management

Study area

Baltic Proper

- ICES SD 25-29:32 ex GoR and GoF
- Area: c.a $2.4 \cdot 10^5 \text{ km}^2$

Characteristics

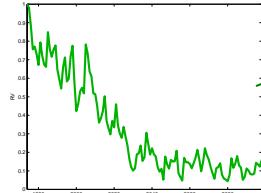

- large semi-enclosed brackish water body
- low diversity
- high productivity
- eutrophication
- high fishing pressure
- climate influences through temperature and salinity
- irregular inflows from North Sea
- stratified
