The meeting was attended by experts from the National Institute for Marine Research and Development "Grigore Antipa" Constanta (INCDM), the National Agency for Fisheries and Aquaculture, Romania (NAFA), as well as representatives of local fisherman associations/federations at the Romanian Black Sea coast.

It was an excellent opportunity to introduce MareFrame to the Romanian stakeholders, both regulatory bodies (NAFA) and fishermen.

Turbot fishery is one of the crucial segments of Romanian fisheries, and all participants agreed that special attention needs to be paid for a sustainable exploitation of this valuable resource.
