

**MareFrame, introduced during the International Conference
“Ecosystem Approach to Fisheries in the Mediterranean and Black Seas”,
Barcelona, Spain, 9 - 10 April 2014**

Synergy with the FP7 EU CREAM project “Improving research in support to scientific advice to fisheries management in the Mediterranean and Black Seas”

During the International Conference *Ecosystem Approach to Fisheries in the Mediterranean and Black Seas*, Barcelona, Spain, 9 - 10 April 2014 (organized by: Institut de Ciències del Mar de Barcelona, CSIC, Spain and International Centre for Advanced Mediterranean Agronomic Studies - Mediterranean Agronomic Institute of Zaragoza - CIHEAM-IAMZ), in the frame of FP7 EU CREAM project “Improving research in support to scientific advice to fisheries management in the Mediterranean and Black Seas”), members of the MareFrame project (**Francesco Colloca** - CNRC-IAMC, Italy; **Radu Gheorghe** and **Tania Zaharia**, INCDM, Romania) presented the next scientific papers:

- *Critical assessment about the current understandings in the framework of Ecosystem Approach of Fisheries in Mediterranean and Black Sea*
- *Impact of the turbot fishery on cetaceans in the Romanian Black Sea area*
- *Reconciling fisheries and habitats protection in Romanian coastal marine protected area*

The papers were published in *Scientia Marina* 78S1/2014, the journal of marine sciences published by the Institut de Ciències del Mar de Barcelona (CSIC).

With this occasion, the MareFrame leaflets were distributed to the participants (including stakeholders from Mediterranean and Black Seas) and a short presentation of the project was realized.
