

MareFrame Work Package & Case Study leaders connectivity

On 7th October 2014, MareFrame held a Work Package (WP) & Case Study (CS) leaders workshop to review the project status and plan the next steps. Special emphasis was put how the work in different WPs and CSs is linked in order to enhance the connectivity and communication strategies. Each WP and CS leader provided information on how their work feeds into other WPs and CSs as well as expected input from other WPs and CSs.

The meeting was considered highly useful and it is worth mentioning that the co-creational approach to the developmental work was proven of importance. The stakeholder meetings on launching of the case studies gave valuable input into the work as well as being an eye-opener for some MareFrame participants as it changed their perspective towards involving stakeholders from the very start of the work. What the scientists think is of importance for fisheries management is not necessary the same as the stakeholders consider
